

# How to Save AsReader Gun CSV Files to Mac/PC via iTunes

# Preparation – Page 1/1

1. Prepare the following:

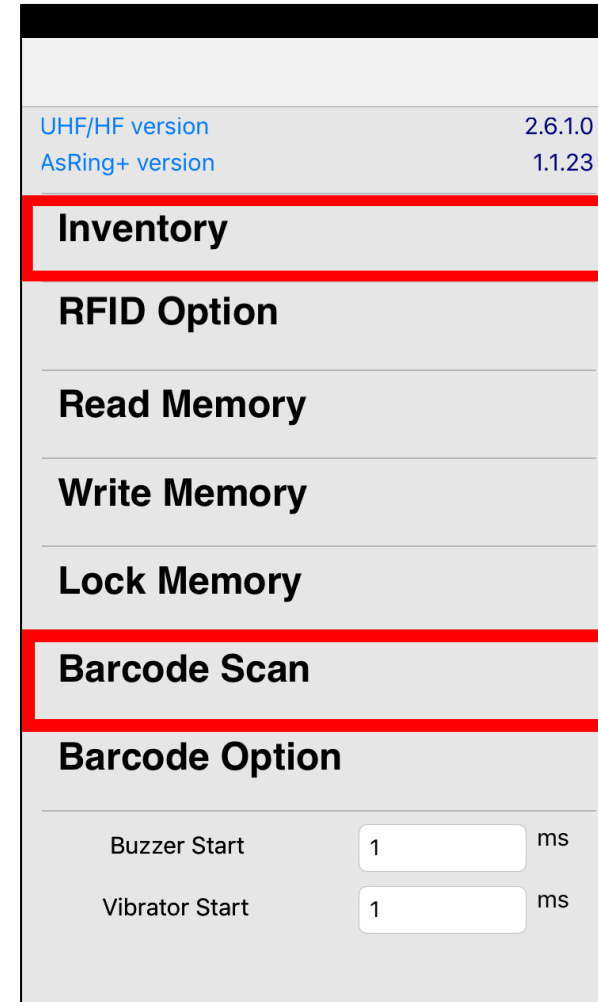

## Hardware

- Assembled Gun
- A compatible iOS Device
- Lightning-to-USB cable
- A Mac or PC

## Software

- AsReaderGUN App (iOS Device)
- iTunes (on the Mac or PC)

2. Open AsReaderGUN App.

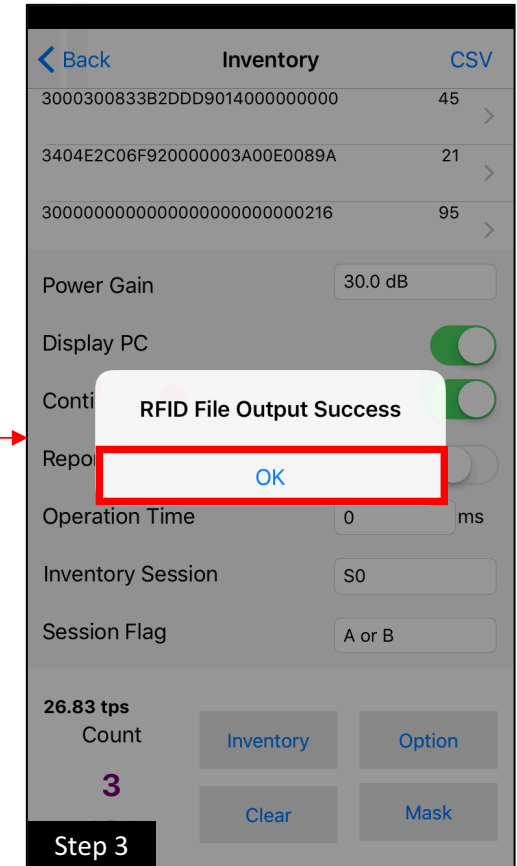

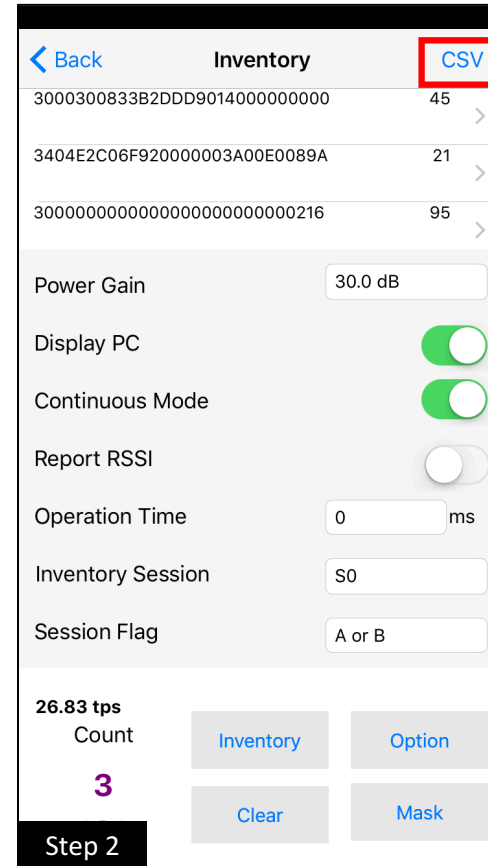

RFID CSV File from the AsReaderGUN App Section

Barcode CSV File from the AsReaderGUN App Section

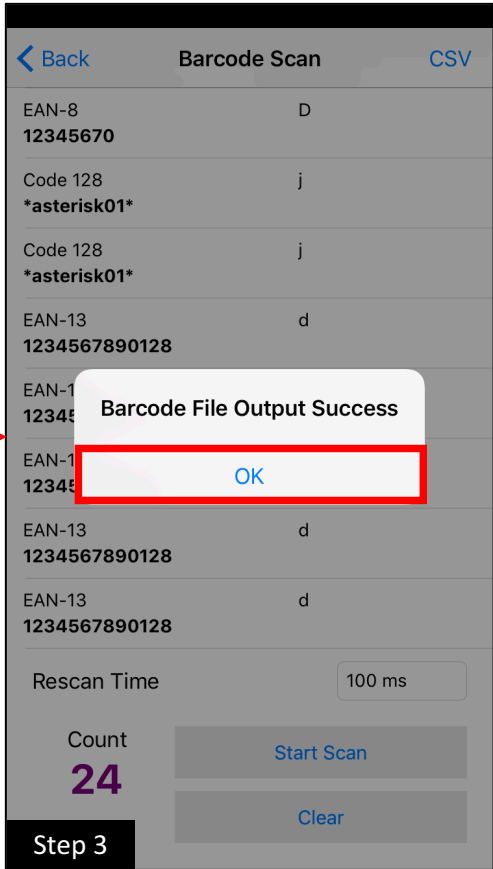

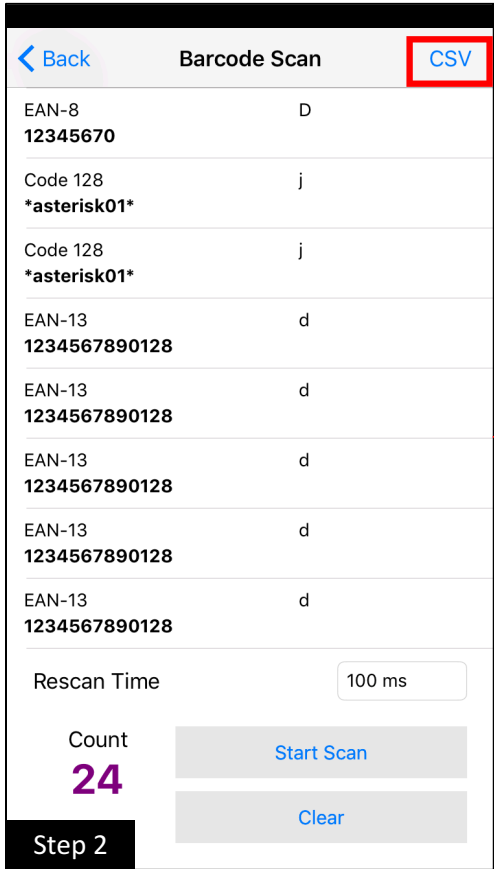

# RFID CSV File from the AsReaderGUN App – Page 1/1

1. Under 'Inventory', begin scanning RFID tags.
2. After you have completed reading the tags you wish to read, tap the 'CSV' button on the top-right.
3. The dialog-box shown should appear.

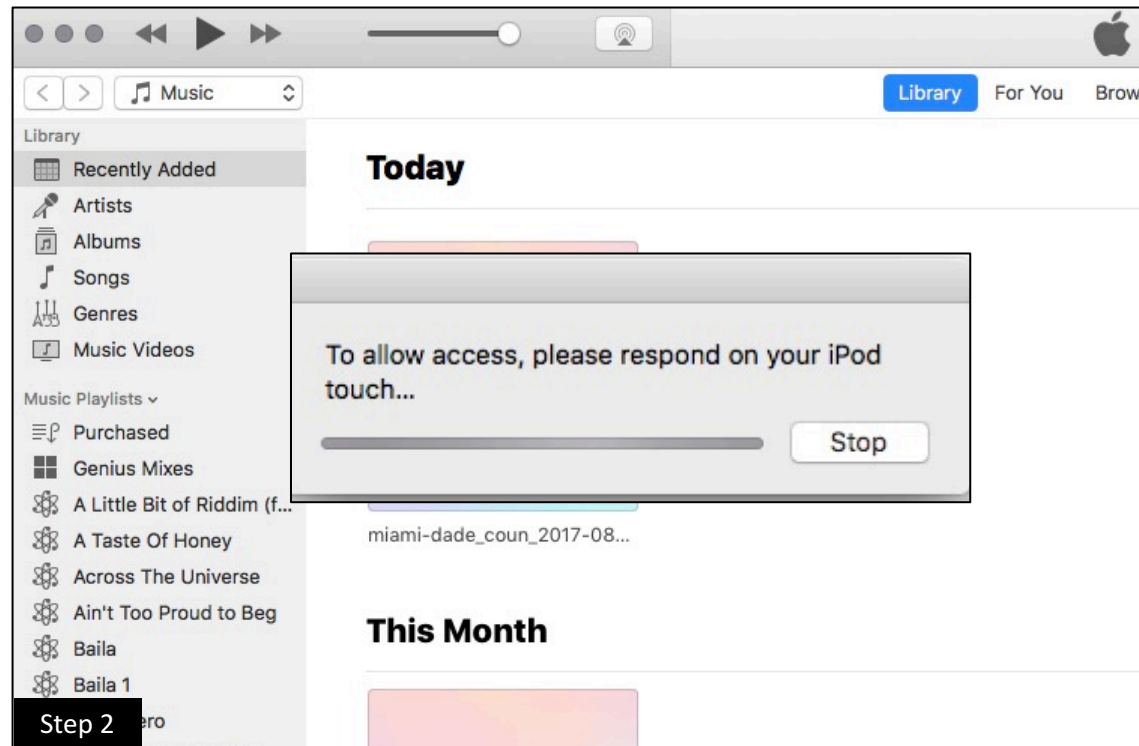

# Barcode CSV File from the AsReaderGUN App – Page 1/1

- 1. Under 'Barcode Scan', begin scanning Barcode tags.
- 2. After you have completed scanning the barcodes you wish to scan, tap the 'CSV' button on the top-right.
- 3. The dialog-box shown should appear.

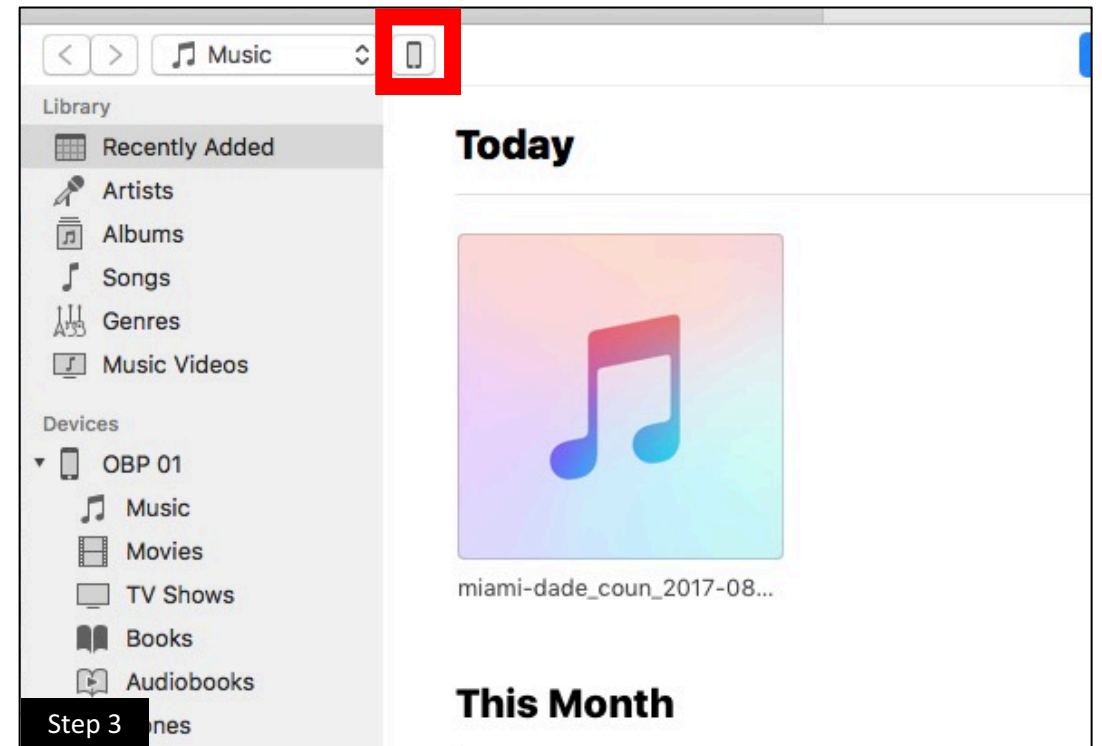

# iTunes on Mac/PC Section – Page 1/3

1. Connect the iOS device to a Mac or PC using a Lightning-to-USB cable.
2. Open iTunes on the Mac/PC and **allow permission** to connect on **both** the iOS device and the Mac/PC.  
(\*On the iOS device: select “Trust this Mac/PC”)

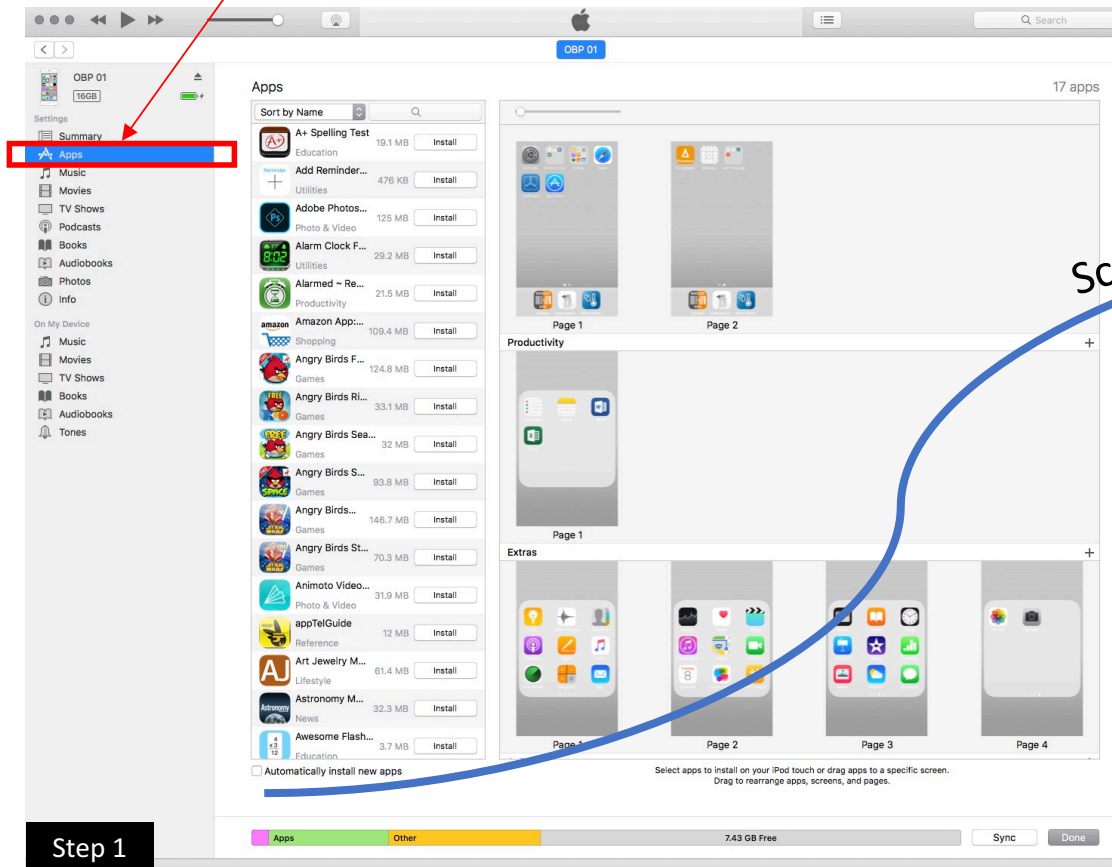

3. Select the device icon.

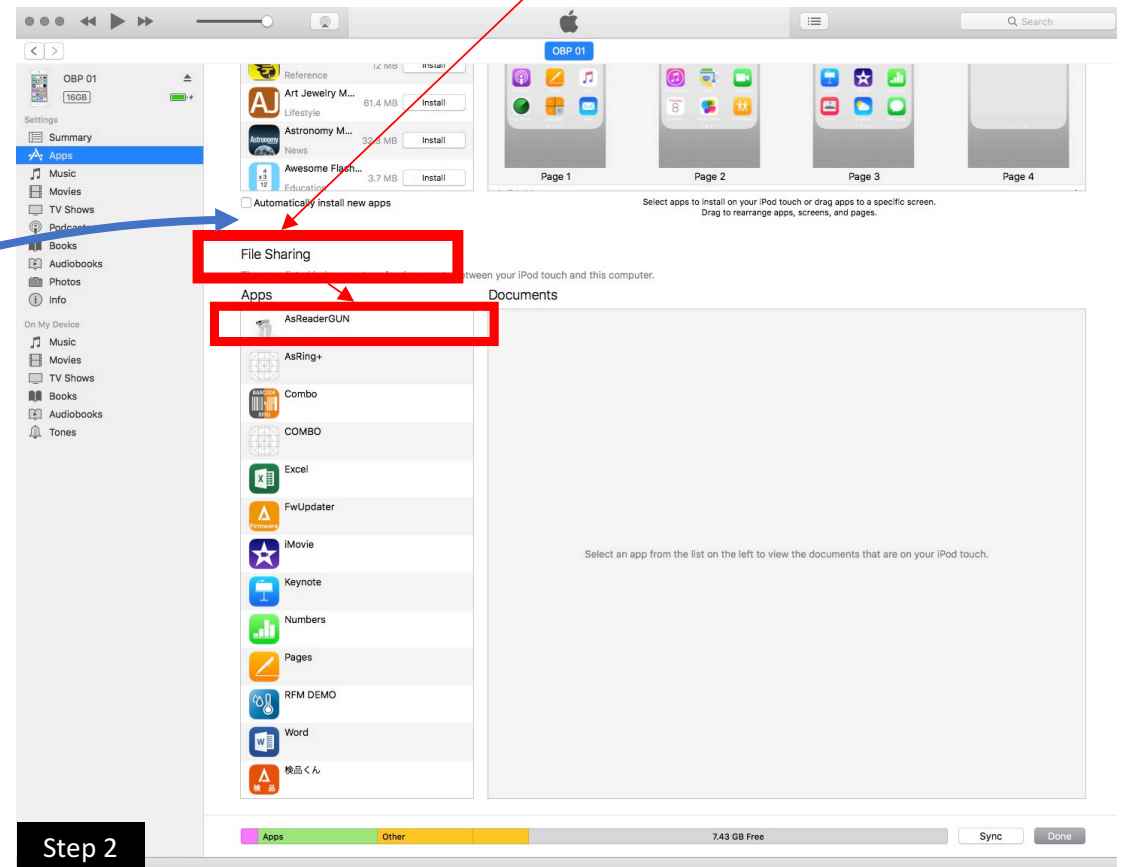

# iTunes on Mac/PC Section – Page 2/3

1. Select 'Apps' as shown.

2. Scroll **ALL the way down to 'File Sharing'** (the group below "Apps" group) and select 'AsReaderGUN' App.

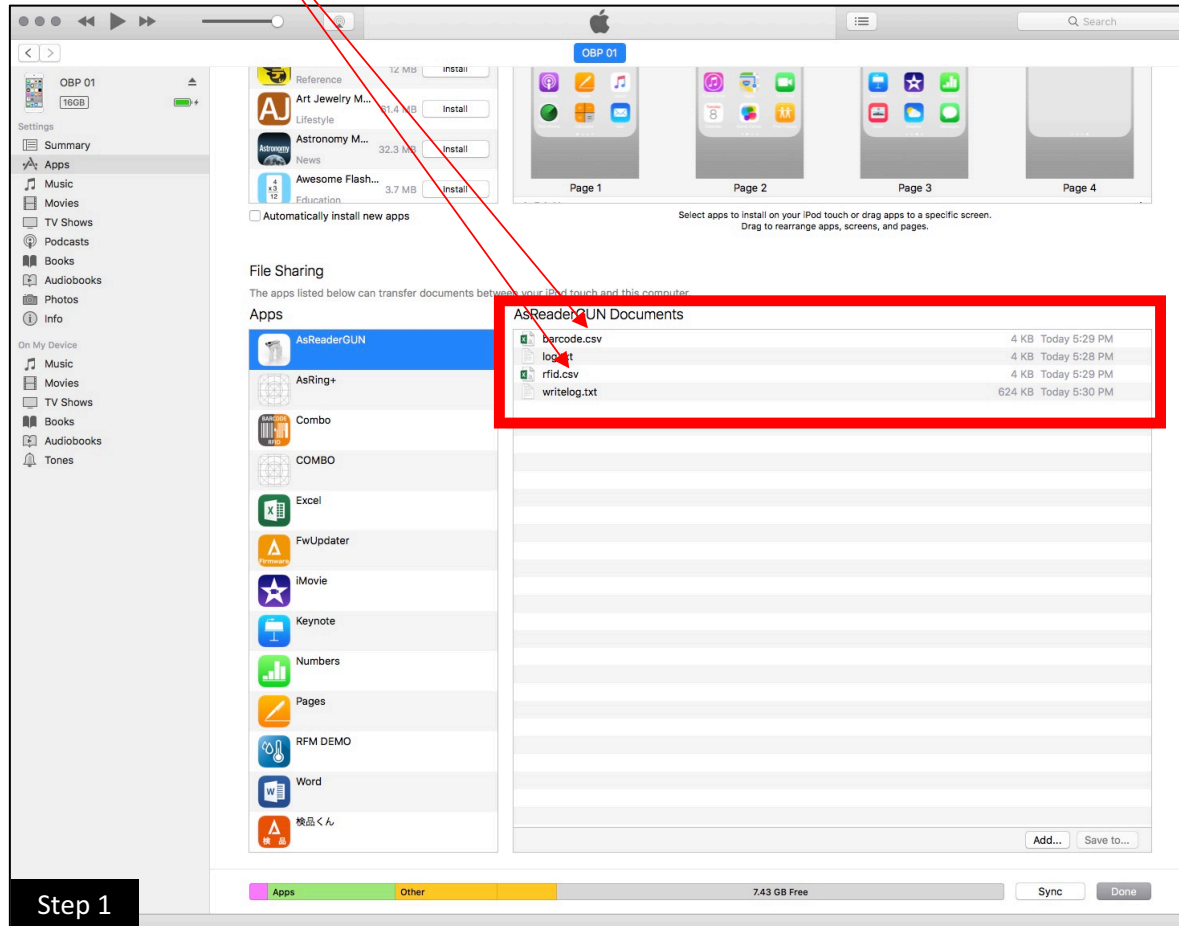

Step 1

Step 2

# iTunes on Mac/PC Section – Page 3/3

1. The CSV files should be located as shown.

2. Drag/drop the files to a folder on your Mac/PC and the CSV data can be accessed via Excel, Notepad, etc.  
(Alternative: “Save to...” button)
